

SYMPHONY. *Virtual.* SUITE.

“  
A BETTER approach to payment processing starts with a different approach.  
One that's simple and TRANSPARENT – and built to deliver RESULTS.  
That's the **VERACITY** *difference*.  
”

## TRANSFORM YOUR PAYMENT ACCEPTANCE AND ACCOUNTS RECEIVABLE TO ACCELERATE CASH FLOW AND REDUCE COST.

MOST BUSINESSES ALREADY RECOGNIZE THE IMPORTANCE OF ELECTRONIC PAYMENT ACCEPTANCE, but many organizations are just now realizing the value of a Web-based payments system.

If you're dealing with error-prone processes, lengthy receipt-to-pay cycles or the high cost of billing preparation, you can transform your payment acceptance and accounts receivable (AR) operations with electronic bill presentment and payment (EBPP). EBPP is comprised of virtual payment solutions that can drastically reduce the cost of manual processes, improve cash flow management and increase customer satisfaction.

Veracity Payment Solutions offers the **Symphony Virtual Suite™**, the latest in web-powered technology to streamline your payment processes, safeguard your vital customer data and eliminate the need for paper invoicing.

Built within the PCI DSS compliant framework, **Symphony Virtual Suite** is a browser-based, on-demand Web platform or “payment Gateway” and is available as a Software-as-a-Service (SaaS) solution. SaaS allows for rapid deployment efficiencies that can easily be integrated with your existing core systems, without the need for up-front capital investment for hardware, software or IT infrastructure and support.

## **SYMPHONY VIRTUAL SUITE™**

The payment Gateway is the core performer of the Symphony Virtual Suite offering powerful, flexible and affordable Web technology to securely process your payment transactions.

The Gateway supports any eCommerce, retail or mail order environment and all major credit cards. Utilize fraud prevention tools and transaction monitoring to provide that extra security your business needs. You also benefit from user friendly tools to integrate the payment process into existing order entry products, shopping carts and electronic cash registers.

### **Payment Processing**

» **Virtual POS** – Utilize a secure, reliable and cost-effective system for authorization and management of payment transactions over the Internet. Turn your computer into a versatile all-in-one payments tool with our Virtual POS (point of sale) solution. With the advantages of speed, reliability and cost-saving benefits, Virtual POS is easy-to-use and can process credit card and Pin-less debit in card present and card not present environment.

» **AutoBill** – Recurring transactions, such as subscriptions or installment payments are more convenient and efficient with this flexible, secure web-based solution. Your customers can pre-arrange to automatically make payments directly from their account to yours, speeding your access to cash and simplifying collections. Great browser-based reporting capabilities make monitoring your cash flow and managing your business easier than ever.

» **E-commerce Toolkit** – This scalable solution contains integration tools simple enough for new online businesses, yet comprehensive enough for the most demanding e-commerce professional. From a basic “Buy” button and shopping cart, to customized pay pages with full web site integration, our e-commerce toolkit makes it easy to develop, maintain and grow a successful online business

### **Customer Account Management**

» **Secure Card Vault** - - With tokenization capabilities, you can store your customer credit card, electronic check and other sensitive data in a secure and reliable industry (PCI, PABP) compliant environment without the need to store this data on your local servers..

### **Electronic Bill Presentment and Payment (EBPP)**

» **Electronic Invoice** – Efficiently manage your receipt-to -pay cycles with electronic invoicing all through a single online process. Customers can securely submit payment via ACH, pin-less debit or credit card directly to your bank account. Payments can also be initiated anytime from your customer’s email account or through your company’s Web site..
